

Support our discoveries... give today

The Walter and Eliza Hall Institute is home to more than 800 researchers who are working to understand, prevent and treat diseases including cancer - particularly blood, breast, ovarian, colon and lung cancers - type 1 diabetes, rheumatoid arthritis, coeliac disease, HIV, tuberculosis and malaria.

We are doing this because:

- ▶ In 2010, more than 114,000 new cases of cancer were diagnosed in Australia and more than 43,000 Australians died of cancer.
- ▶ Breast cancer is the second-highest cause of cancer death in Australian women.
- ▶ Malaria kills up to one million people each year.
- ▶ More than 120,000 Australians have type 1 diabetes.
- ▶ Coeliac disease affects approximately 1 in 100 Australians.

Today, more than 100 clinical trials based on discoveries made at the institute are currently underway. These include trials of a new class of anti-cancer drugs and vaccines for type 1 diabetes, coeliac disease and malaria.

The Walter and Eliza Hall Institute relies on donations from the community to continue its vital research. Donations of \$2 or more are tax deductible in Australia.

Your support helps us improve people's lives.
